PROJECT DETAILS

1. Project Name: Informa Markets

Role: Automation Tester

Tools and Technology Used: Selenium, Java, Maven, Data Driven Framework, TestNG, POM, Apache POI, Extent Report, Log4j Duration: June 2021 to till date

Project Description:

Online and internet based digital technologies and platforms are used in digital marketing to promote Products and services. With Google ads, businesses can highlight what makes their products and services Unique, so they can reach customers who are searching for what they have to offer.

The media ecosystem helps manage related data and decide what to do with it. This allows the user to Decide where he wants his ads to appear and will ensure that they are seen by the right people. The media Ecosystem is useful for setting and managing campaign budget caps.

Hence, the user is never charged more than a daily, weekly, or monthly budget cap that can be adjusted

At any time. A single Dashboard allows users to control multiple accounts and make changes across

Campaigns easily. As well as providing user friendly recommendations for budgets and campaigns based On business performance, the application will offer estimated budgets and campaigns based on business Performance.

Roles and Responsibilities:

- Identified End to End Test Scenarios, Test Cases and Test Data.
- Writing test cases for automation.
- Responsible for gathering test execution data on daily basis and sending mail to Team
- Responsible for getting clarification from Development Team regarding defects.
- Performing Functional Testing, Regression Testing.
- Identifying test cases for Regression Suite and updating the script accordingly.
- Validation of Expected output vs Actual output in respective database tables Using SQL.
